

Model Investment Guidelines - Version 1 - 20th May 2017

Name:	Nucleus Tactical Growth Fund
Portfolio Code	
Investment Manager:	Nucleus Wealth
Inception:	TBC
Investment strategy:	<p>This strategy uses a top-down global macro strategy that seeks to identify and exploit inefficiencies between markets, regions, countries, and sectors for an Australian investor. It uses a mix of tactical asset allocation, mid and large cap stock selection (within the authorised investments below) in a transparent low cost structure. This gives investors a core investment that can be efficiently mixed with other assets or strategies to deliver optimum returns for the risk taken.</p> <p>All positions are currently implemented through physical investments. Rebalancing is considered at least monthly by the asset allocation committee. The committee often takes a longer term view on assets and will choose to gradually build positions with dividends/excess capital rather than actively trading where ever possible.</p>
Investment objective:	This is a tactical asset allocation strategy aiming to generate returns 4.5% above Australia inflation over rolling 5 year periods. It has a mix of bonds and stocks designed for investors who have a higher tolerance for risk and want to take tactical tilts to different asset classes based on valuation.
Investment Timeframe	Five years
Benchmark:	(ACPI.KR) ABS – Australian Consumer Price Index plus 4.5%
Performance Benchmark (if different):	N/A
Authorised Investments:	<ul style="list-style-type: none"> • MSCI Australia Index • MSCI AC World ex Aust Index • Exchange – traded Government Bonds • ETF’s conforming to: <ul style="list-style-type: none"> ○ The majority (70%) of the ETF assets fall into one of the above categories ○ Hold physical (i.e. not synthetic) ○ Track a major market index
