# Technology: blockchain

- External verification of transfers
- Central/distributed
   permanent record of every
   transaction

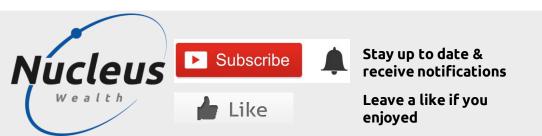

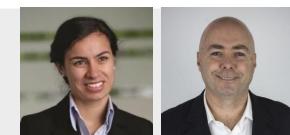

#### **Technology: Bitcoin**

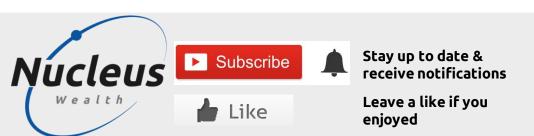

- First mover advantage
- Limited supply
- Issues with power usage
- Issue with number of transactions

#### **Technology: Cryptocurrencies**

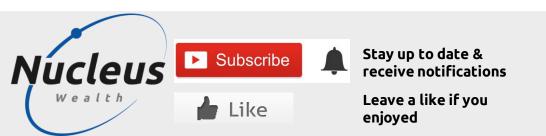

- Many different types
- Solving different issues
- Bitcoin has problems, many are solved by other crypto currencies

#### What is Money: Background

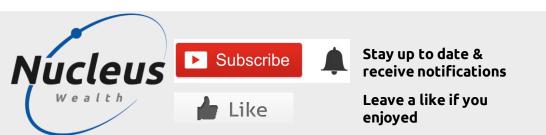

- a medium of exchange;
- a unit of account;
- a store of value; and,
- sometimes, a standard of deferred payment

#### What is Money: Fiat Money

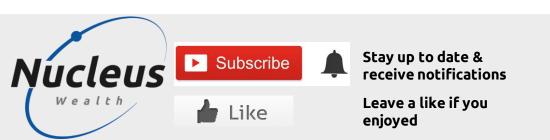

- Fiat money needs trust
- Central banks created (in part) to manage trust
- Cryptocurrencies are fiat money trust is required
- Convertibility to real money is now critical
- Exchanges need your money

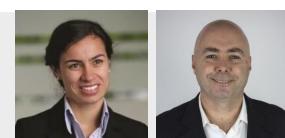

#### What is Money: Sovereign digital applications

- Sweden e-kronor in trial, finishing in Feb
- China USD300m trial just finished
- UK central bank supportive, written several papers
- Japan J Coin has some digital features
- Australia, Netherlands, Canada, Denmark all writing about and considering

#### What is Money: Private Money is not new!

- Disney Dollars, frequent flyer points
- In the 1800s individual banks created US dollars
- Four challenges for any currency:
  - $\circ~$  belief and confidence
  - $\circ$  distribution
  - volatility
  - $\circ~$  capitalisation and sovereign backing

#### What is Money: In a crisis will it be there?

- Private money is not want governments want
- Central banks formed for crises bitcoin is to avoid central bank
- Climate change?
- Terrorism?

## Valuation: For Bitcoin, the story is the important factor

- anonymous?
- transactional?
- financial asset?
- hedge against inflation?
- disintermediating traditional finance?
- low interest rate asset / Gold 2.0?
- institutional involvement?

#### Recap

- Don't get hung up on individual flaws in cryptocurrencies technology works and is good
- Don't confuse private money with crypto
- Will central banks & governments allow private money
- This time is not different
- They are worth whatever the greater fool is prepared to pay
- Exchanges not regulated: Don't be the last one to sell
- 10x bigger and central banks will have to act. Could be earlier.

#### Key negative factors

- •Virus in Northern Hemisphere
- Valuation
- Latent bankruptcies
- Low genuine credit growth

#### Other negative factors

- Short term gap in US economic conditions
- Inequality longer-term effects
- •Effects gradually rolling off
- •Structural change in industries leading to weak demand
- Cycle
- •Demand weak
- •Australian stimulus badly targeted

#### Viewer question of the week

#### Would you invest in cryptocurrency? If so, which one, and why?
