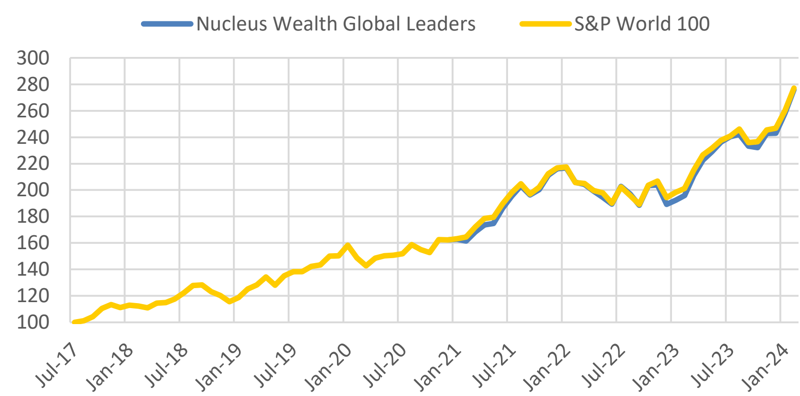
Cumulative Returns



Investment Strategy

The model provides exposure to a portfolio of the largest global equities by market capitalisation. The model will generally hold the 40 largest equity securities listed on developed market exchanges with securities selected using a rules-based approach. The portfolio may tend to underperform when larger companies underperform smaller companies within the index.

1. Portfolios with low balances may deviate performance due to share parcel sizes. 2. Based on strategic asset position. May be higher/lower based on tactical positions.
3. Administration fees vary on account type, amount invested and platform used. See PDS for details. 4. Inception is 30 Dec 2020.
